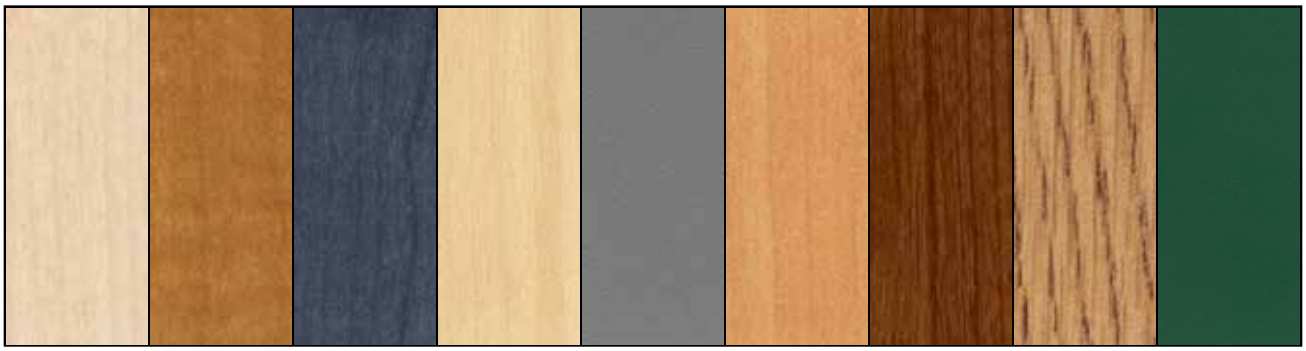
High Pressure Laminate

"HPL" should be specified for wear (horizontal) surfaces or for small volume requirements where Thermofused materials are not available. HPL has high wear and is impact resistance.

All Madix wood products use low-VOC, low-Formaldehyde substrates and adhesives and comply with California Air Resources Board Regulations. Products may qualify for LEED credits under 4.3,4 Environmental Quality, 4.1,2 Recycled Materials, and 6.0 Rapidly Renewable Resources.



Natural Maple L696 | African Limba L702 | Chicago Blues L897 | Kensington Maple L808 | North Sea L85 | Natural Pear* L649 | Amber Cherry* L795 | Golden Oak* LO | Spectrum Green* LSG

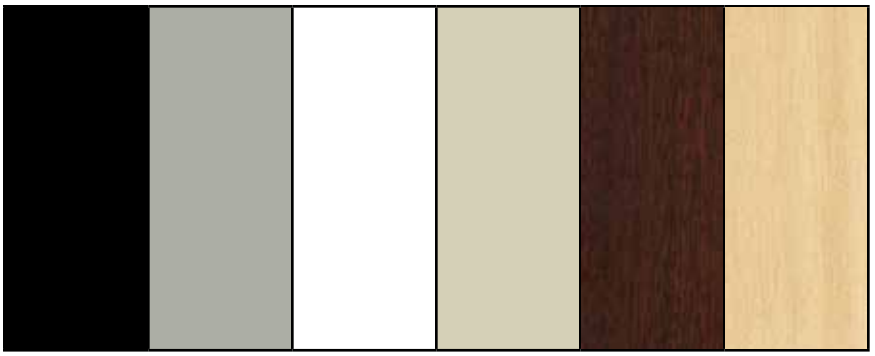
* May require additional lead time

NOTE!
Selections refer to thick [⅝" (15.9 mm) or thicker] panels used for counters, end panels, etc. Back Panels [¼" (6.4 mm)] selections may vary – inquire through Customer Service for specific requirements.

NOTE!
There will be a $100 set-up charge per order for laminate finishes not listed.

Thermofused Panels

Thermofused panels are ideal for non-wear surfaces and have substantial impact and wear characteristics compared to melamine panels previously available. The product is produced using hot press laminating polyester or melamine resin impregnated self-bonding paper to wood substrate. Performance specifications are available from the American Laminations Association. Madix does not recommend the use of Thermofused panels on horizontal or other wear surfaces.



Black MB | Dove Gray MDG | Snow White MSW | Sahara MS | Mahogany MM | Kensington Maple L808

NOTE!
Thermofused Panel and High Pressure Laminate samples may vary from actual products. Request sample if exact match is required.
