• STP type shelves are straight-in, horizontal insertion into upright slotting

Column Loading

Column loading is the vertical load, measured in pounds, that can be applied on any upright. Each upright bears one half of the load of each shelf load that it supports.

500 lbs plus 500 lbs = 1000 lbs
 1000 lbs divided by 2 = 500 lbs
 Column Load on Center Upright

500 lbs plus 500 lbs = 1000 lbs
 1000 lbs divided by 2 = 500 lb
 Column Load on Center Upright

750 lbs plus 750 lbs = 1500 lbs
 1500 lbs divided by 2 = 750 lbs
 Column Load on Center Upright

Offset Loading

Offset loading is measured in inch-pounds and represents the bending load at the connection of the base shoe and the upright. To determine if you exceed the load limit of the fixture, take the difference between the larger inch-pound calculations on one side of the fixture and the inch-pound calculations on the other. This difference cannot exceed 15,000 inch-pounds. For wall sections, the calculation for the one side cannot exceed 15,000 inch-pounds.

Evenly Loaded Shelves on Gondolas

Divide each shelf depth by 2. Multiply times the weight on shelf to determine individual shelf inch-pound load.

- D1** 18"/2" = 9" x 300 lbs or 2700 inch-pounds
- D2** 18"/2" = 9" x 400 lbs or 3600 inch-pounds
- D3** 22"/2" = 11" x 500 lbs or 5500 inch-pounds
- E1** 18"/2" = 9" x 300 lbs or 2700 inch-pounds
- E2** 18"/2" = 9" x 300 lbs or 2700 inch-pounds
- E3** 22"/2" = 11" x 300 lbs or 3300 inch-pounds

Side D Total = 11800 inch-pounds

Side E Total = 8700 inch-pounds

$$\begin{array}{r} \text{Subtract E from D: } 800 \text{ inch-pounds} \\ 8700 \text{ inch-pounds} \\ \hline 3100 \text{ inch-pounds} \end{array}$$

SAFE!
3100 inch-pounds does not exceed the 15000 inch-pound maximum

Evenly Loaded Shelves on Wall Sections

Divide each shelf depth by 2. Multiply times the weight on shelf to determine individual shelf inch-pounds load.

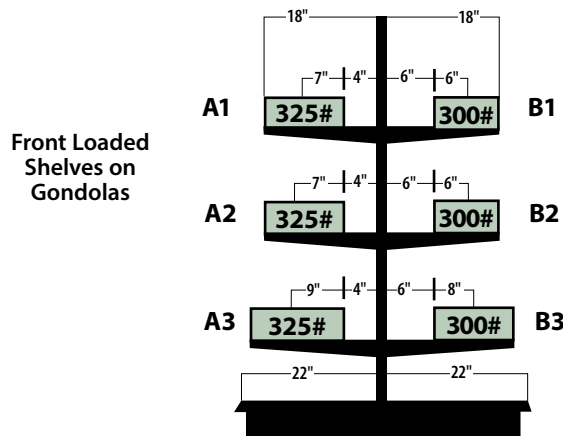

- F1** 18"/2" = 9" x 300 lbs or 2700 inch-pounds
- F2** 18"/2" = 9" x 400 lbs or 3600 inch-pounds
- F3** 22"/2" = 11" x 500 lbs or 5500 inch-pounds

Side F Total = 11800 inch-pounds

SAFE!
11800 inch-pounds does not exceed the 15000 inch-pound maximum

Front Loaded Shelves

Important: Front-loaded shelves are the most common to exceed fixture-loading capacities. Compare the increases in inch-pounds of front-loaded shelves over evenly loaded shelves, particularly on wall sections!

Front Loaded Shelves on Gondolas

A front-loaded shelf is one that has a void between the back panel and the merchandise. Take one half the loaded area's dimensions plus the gap dimensions at the back and multiply times weight on the shelf to determine the individual inch-pound load.

- A1** 7" + 4" = 11" x 325 lbs or 3575 inch-pounds
- A2** 7" + 4" = 11" x 325 lbs or 3575 inch-pounds
- A3** 9" + 4" = 13" x 325 lbs or 4225 inch-pounds
- B1** 6" + 6" = 12" x 300 lbs or 3600 inch-pounds
- B2** 6" + 6" = 12" x 300 lbs or 3600 inch-pounds
- B3** 8" + 6" = 14" x 300 lbs or 4200 inch-pounds

Side A Total = 11375 inch-pounds

Side B Total = 11400 inch-pounds

$$\begin{array}{r} \text{Subtract A from B: } 11400 \text{ inch-pounds} \\ -11375 \text{ inch-pounds} \\ \hline 25 \text{ inch-pounds} \end{array}$$

SAFE!
25 inch-pounds does not exceed the 15000 inch-pound maximum

Front Loaded Shelves on Wall Sections

A front-loaded shelf is one that has a void between the back panel and the merchandise. Take one half of the loaded area's dimensions plus the gap dimensions at back and multiply times weight on the shelf to determine the individual inch-pound load.

- C1** 5" + 8" = 13" x 300 lbs or 3900 inch-pounds
- C2** 5" + 8" = 13" x 325 lbs or 4225 inch-pounds
- C3** 7" + 8" = 15" x 325 lbs or 4875 inch-pounds

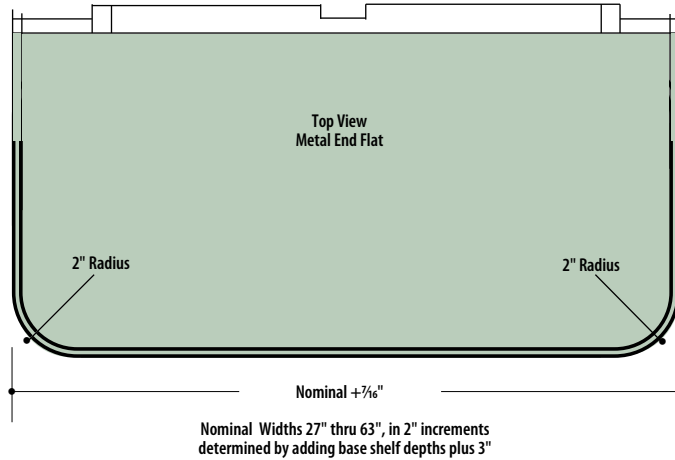

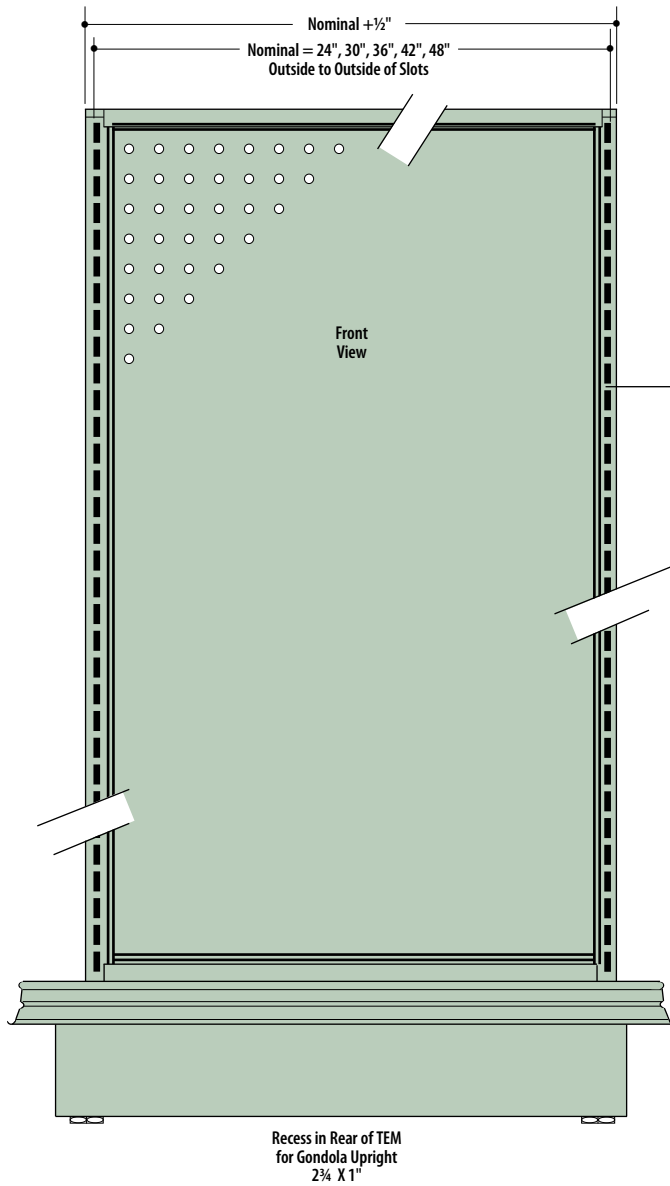

Side C Total = 13000 inch-pounds

- Nominal Upright Heights 36" (914 mm) thru 96" (2438 mm) in 6" (152 mm) increments
- Nominal Base Shelf Depths 12" (305 mm) thru 30" (762 mm) in 2" (51 mm) increments
- Nominal Upper Shelf Depths 8" (203 mm) thru 30" (762 mm) in 2" (51 mm) increments

SFA-RD Anchors

- Beginning at each end of a Maxi Line Gondola or Wall Fixture run, Base Shoe Anchor Brackets are installed at alternate Base Shoes
- All runs with an odd number of Uprights will be anchored at alternate Base Shoes
- All runs with an even number of Uprights will be anchored at alternate Base Shoes, with remaining single section at, or adjacent to, the middle of the run, as indicated by the shaded area in examples below
- Two expansion bolts per anchor

For Floor Anchors and Expansion Bolts,
see SFA-(TYPE)-25 and SFA-EB(PACK) in the catalog index.

Preventing Fixture Overturning

- To preclude overturning, the height of the upright cannot exceed the leveler spacing dimensions multiplied by six
- If uprights exceed the heights shown, they must be secured at the top, or one of the following corrections must be made:
 - Gondola*: Base Shoe Levelers must be anchored to the floor as shown below
 - Wall*: Base Shoe Levelers and Standard Upright Levelers must be anchored to the floor as shown below

Gondola Ends

One Maxi Line Gondola End is required to complete any length of Gondola run.

Each Maxi Line Gondola End consists of the following:

- A** One Basic Upright
- B** Two Base Shoes
- C** One Upright Cap
- D** Two pair Base End Covers
- E** Two Upright End Covers

Gondola Sections

Each Maxi Line Gondola section locks to the adjacent section for any length Gondola run.

Each Maxi Line Gondola Section consists of the following:

- F** Two Kickplates
- G** Two Base Shelves
- H** Two backs, HH, PP or HP, two piece backs at 78" and above
- I** One Upper Spanner
- J** One Center Spanner from 42" up to 96", plus one Splicer Spanner at 78" and above
- K** One Lower Spanner
- L** One Basic Upright
- M** Two Base Shoes
- N** One Upright Cap

Wall Ends

One Maxi Line Wall End is required to complete any length Wall run.

Each Maxi Line Wall End consists of the following:

- A** One Basic Upright
- B** One Base Shoe
- C** One Upright Cap
- D** One pair Base End Covers
- E** Two Upright End Covers
- F** One Wall Section Retainer Pin

Wall Sections

Each Maxi Line Wall section locks to the adjacent section for any length Wall run.

Each Maxi Line Wall Section consists of the following:

- G** One Kickplate
- H** One Base Shelf
- I** One back, H or P, or two 2s, HH, PP or HP, two piece backs at 78" and above
- J** One STL Upper Spanner
- K** One Center Spanner from 42" up to 96", plus one Splicer Spanner at 78" and above
- L** One Lower Spanner
- M** One Basic Upright
- N** One Base Shoe
- O** One Upright Cap
- P** One Wall Section Retainer Pin

Basic Upright^A

- Slotted 1" (25 mm) OC for flexibility plus maximum space
- Comprised of heavy-gauge, high-tensile steel components welded into a single unit with a 15,000 inch-pound rating
- All Basic Uprights have an integrated leveler
- Kickplates of either closed or open type (or reinforced base shoes) must be installed on shelving runs

BU-(NH)

BU Basic Upright
 NH Nominal Height 36" to 144" in 6" increments
 (914 mm to 3658 mm in 152 mm increments)

Half Upright^A

- For wall-mounted applications, install on 36" or 48" (914 mm or 1219 mm) centers and use standard Madix shelves and accessories
- Does not have provisions for back panels
- Hardware not included
- Not load rated

HU-(NH)

HU Half Upright
 NH Nominal Height 36" to 96" in 6" increments
 (914 mm to 2438 mm in 152 mm increments)

Extension Upright^A

- Connector inserts easily into top of shelving section Upright
- Set screws expand the connector, solidly aligning assembly

EU-(NH)

EU Extension Upright
 NH Nominal Height 6" to 54" in 6" increments
 (152 mm to 1371 mm in 152 mm increments)

Nominal Height	Maximum Load Capacity
06"-18"	200 lbs per side
19"-54"	100 lbs per side

Heavy-Duty Upright

- Recommended for heavier loads placed near the top of the Upright to reduce deflection
- Provides a 30% reduction in deflection, compared to the Madix Basic Upright [BU-(NH)]
- 1" (25 mm) OC for flexibility plus maximum space
- Heavy-Duty Upright [(HDU-(NH))] may be used with Base Shoe Straight-In Level [BSSIL-(ND)] to reduce upright deflection in heavily loaded areas, with an offset load rating of 15,000 inch-pounds
- When Base Shoe Straight-In Level Reinforced [BSSILR-(ND)] is used with a Heavy-Duty Upright [(HDU-(NH))], offset load rating capacity becomes 18,000 inch-pounds
- Levelers included
- Upright Cap (UC) is not included

HDU-(NH)

HDU Heavy-Duty Upright
 NH Nominal Height 36" to 144" in 6" increments
 (914 mm to 3658 mm in 152 mm increments)

NOTE!
 Standard Upper Shelves (two-tab)
 can be installed 5" (127 mm) from
 Base Shelf and Standard Upper Shelves
 (three-tab) 6" (152 mm) from Base Shelf.

Base Shoe Straight-In Locking, Reinforced

- Projection-welded, high-tensile steel provides maximum load capacity
- Exclusive I-beam design is 5" (127 mm) low
- Screwdriver leveling and electrical access
- Straight-in insertion does not require tipping of the Basic Upright for installation
- Convert an existing freestanding Maxi Line Wall unit to a double-sided Maxi Line Gondola unit without removing merchandise
- Ideal for seasonal changes
- Base Shoe finish is Satin Black, PC059
- When used with Heavy-Duty Upright [HDU-(NH)] offset load rating capacity becomes 18,000 inch-pounds

Telescoping Upright Kit

- Slotted Upright fits between backs and extends up to 18" (457 mm) above the fixture when needed
- Kit consists of a 42" (1067 mm) Upright, slotted 18" (457 mm) from the top, with bottom 24" (610 mm) not slotted; kit also includes one Vertical Height Stiffener, one Center Spanner, and a locking pin
- Upright should not extend more than 18" (457 mm) above the fixture
- Upright accepts only two-tab shelves, 8" to 18" (203 mm to 457 mm)
- To be used with up to 72" (1829 mm) tall Uprights; for sections higher than 72" (1829 mm), contact your Madix representative
- Capacity of each section made is 50 lbs evenly distributed static load for a total of 100 lbs if both sides are loaded. Please note this is not per shelf, but per side

TUK-(NL)42

- TUK Telescoping Upright Kit
- NL Nominal Length 3' or 4' (914 mm or 1219 mm)
- 42 Nominal Height 42" (1067 mm)

A Telescoping Upright

- Slim, heavy-gauge Upright accepts all two-tab shelves, 8" to 18" (203 mm to 457 mm)
- The top cap to prevents the Upright from dropping below fixture top
- The top cap has a storage hole for a Retainer Pin when Upright is not in use

TU-42

- TU Telescoping Upright
- 42 Nominal Height 42" (1067 mm)

B Vertical Height Telescoping Upright Stiffener

- Guides Telescoping Upright when raising or lowering for storage

VHTUS-42

- VHTUS Vertical Height Telescoping Upright Stiffener
- 42 Nominal Height 42" (1067 mm)

C Telescoping Retainer

- Pin inserts through Telescoping Upright slots; one Pin is included per Upright

TR

- TR Telescoping Retainer

D Center Spanner^A

- Galvanized snap-in spanner ensures Back Panel rigidity
- Electrical and Telescoping Upright knockouts
- Galvanized only

SC-(NW)

- SC Center Spanner
- NW Nominal Width 3' or 4' (914 mm or 1219 mm)

Back-to-Back Basic Upright

- Two standard Basic Uprights welded into a single rigid unit to support high-offset loading of wall or gondola section
- 28,000 inch-pound load rating

BBWBU-(NH)

- BBW Back-to-Back Welded
- BU Basic Upright
- NH Nominal Height 84" to 144" in 6" increments
(2134 mm to 3658 mm in 152 mm increments)

Back-to-Back Upright End Cover

- Plastic Upright End Cover to trim end of Back-to-Back Upright [BBWBU-(NH)]

UECBBU-(NH)

- UEC Upright End Cover
- BBU Back-to-Back Upright
- NH Nominal Height 84" to 144" in 6" increments
(2134 mm to 3658 mm in 152 mm increments)

Back-to-Back Straight-In Locking Base Shoe

- Two Base Shoes welded into a stacked configuration
- Gives additional support at lower section of Back-to-Back Basic Upright [BBWBU-(NH)]

BBBSIL-(ND)

- BBBS Back-to-Back Base Shoe
- SIL Straight-In Locking
- ND Nominal Depth 18" to 30" in 2" increments
(457 mm to 762 mm in 51 mm increments)

Back-to-Back Base End Cover

- Modified to trim the Base Ends of Back-to-Back Base Shoe [BBBSM-(ND)]
- Unleveled Base Shelf height is 9½" (22 mm)

BBBEC-(ND)

- BBBEC Back-to-Back Base End Cover
- ND Nominal Depth 18" to 30" in 2" increments
(457 mm to 762 mm in 51 mm increments)

Back-to-Back Kickplate

- This extended-height kickplate closes off Base Shoes of the Back-to-Back Upright system
- Full floating feature to fit flush against uneven floors

BBKP-(NW)

- BBKP Back-To-Back Kickplate
- NW Nominal Width 3' or 4'
(914 mm or 1219 mm)

NOTE!
Do not mix components from other systems.

Upright End Cover^A

- Metal or extruded plastic cover trims the end Upright of all runs
- Easy snap-on positive locking
- Standard colors for VC and UEC are Sahara, Chocolate, or Snow White
- Optional colors are available on VC only

(TYPE)-(NH)

- TYPE UEC=Plastic Upright End Cover
VC=Metal Upright End Cover (required on Heavy-Duty Upright [HDU-(NH)])
- NH Nominal Height 36" to 96" in 6" increments
(914 mm to 2438 mm in 152 mm increments)

NOTE!
VC is required on Heavy-Duty HDU-(NH).

Upright Cap^A

- High-impact, molded-plastic cap completes the open, top end of Upright
- Provision for tapered or threaded stem sign holders
- Fits Telescoping Upright knockout in Top/Lower Spanner
- Sold only in packs of 10
- Available in Sahara or Clear

UC-10

- UC Upright Cap
- 10 10 Pack

NOTE!
Upright Cap (UC) is not included in sections greater than 66" high.

Basic Upright Wall Mount Support Bracket

- Galvanized support installs in wall side of Upright slotting to mount Basic Upright to wall
- Due to varying field conditions, mounting hardware is not included

BUWMS

- BUWMS Basic Upright Wall Mount Support Bracket

Half Basic Upright Wall Mount Support Bracket^A

- Galvanized support installs in wall side of Upright slotting to mount Basic Upright to wall
- Due to varying field conditions, mounting hardware is not included
- Use at end of wall section to hide bracket

BUWMS-HALF

- BUWMS Basic Upright Wall Mount Support Bracket
- HALF Half

Basic Upright Top Mount Wall Anchor Bracket

- To be used on Maxi Line gondola run, if after installation, it is determined the Basic Upright needs to be anchored to the wall
- Depth is adjustable to allow for different thicknesses of furring strips and building walls that are not straight

BUTMWAB

- BUTMWAB Basic Upright Mount Wall Anchor Bracket

Wall Section Off Wall Stabilizer Kit, Heavy-Duty

- Use when Wall Sections cannot be attached directly to existing walls
- Can be used to allow access behind wall sections
- Provides a standoff when building columns interfere with direct connection to building wall
- Does not increase the load capacity of the Wall Section
- Must be used with each upright in a wall run

NOTE!

To be used as spacer only. It is not designed or intended to increase load capacity of the upright.

WSOWHDSK-(NL)

WSOW Wall Section Off Wall

HDSK Heavy-Duty Stabilizer Kit

NL Nominal Length 06" to 12" in 2" increments
(152 mm to 305 mm in 51 mm increments)

Wall Section Off Wall Stabilizer Kit

- Connects Wall Sections to building wall
- Can be used to allow access behind wall sections
- Provides a standoff when building columns interfere with direct connection to building wall
- Does not increase the load capacity of the Wall Section
- Must be used with each upright in a wall run
- Can be adjusted in the field by cutting the threaded rods
- Small adjustments can be made by adjusting the hex nuts

WSOWSK-(NL)

WSOW Wall Section Off Wall

SK Stabilizer Kit

NL Nominal Length 24" to 36" in 2" increments

Double Tab Bracket

- Connects back-to-back Wall Sections for stabilization
- Can be used when there is a fixture run with a row of building columns

BRKTDT-(NL)

BRKTDT Double Tab Bracket

NL Nominal Length 04" to 20" in 2" increments
(102 mm to 508 mm in 51 mm increments)

Base Shoe Straight-In Locking^A

- Projection-welded, high-tensile steel provides maximum load capacity
- Exclusive I-beam design is 5" (127 mm) low
- Screwdriver leveling and electrical access
- Straight-in insertion does not require tipping of the Basic Upright for installation
- Convert an existing freestanding Maxi Line Wall unit to a double-sided Maxi Line Gondola unit without removing merchandise
- Ideal for seasonal changes
- Base Shoe finish is Satin Black, PC059

BSSIL(OPT)-(ND)

- BSSIL Base Shoe Straight-In Locking
- OPT Blank=Not Reinforced

Column Support Kit

- Column Support Kit contains:
 - 50' (15,240 mm) of banding roll
 - Screw assemblies (qty 10)
 - Band splicers (qty 5)
 - 2"x2" (51 mm x 51mm) angles (qty 30)
 - 30' (9144 mm) of vinyl trimming
- Assemble as follows:
 - Loop banding around column at desired height; secure and tighten using 2" x 2" (51 mm x 51 mm) angles
 - Cut a notch in shelving as needed, lining all edges of the notch with vinyl trimming
 - Install shelving on top of angles and into fixtures
- Column size and location will affect the number of shelves each kit can support (estimated 10 shelves per kit)

Tubular Outside End Merchandiser, Mount (TOEM)

- Standard TOEM rests on floor for greater load capacity and mounts outside the gondola upright
- May be used on gondola uprights of same height, higher uprights, or uprights with extensions
- TOEM requires Base End Covers on gondola run
- TOEM may be used with Hypermaxi system

NOTE!
Use Freestanding Metal End Flat (FMEF) only.

Load Capacity

- Total maximum load for all shelves installed on TOEM may not exceed 1000 lbs
- Provided hardware must be installed, and the first three adjacent sections must have upper shelves installed on both sides

NOTE!
If using a Standard Upper Shelf [SUS-(NW)(ND)] on this product it will reduce load capacity of the Standard Upper Shelf by half.

End Frame Stabilizer

- Secures any combination of two, 3' or 4' (914 mm or 1219 mm) gondola sections to the End Frame
- The End Frame Stabilizer is 8'L (2,438 mm)
- Used to span gondolas at least 8' (2,438 mm) long
- Can be used for two 4' (1219 mm) sections, two 3' (914 mm) sections, or one 4' (1219 mm) and one 3' (914 mm) section

EFS

- EFS End Frame Stabilizer

End Frame Upright End Cover

- Extruded-plastic cover trims the End Upright of run below the End Frame
- Easy, snap-on positive locking
- Available in Black or Chocolate finishes only

UECEF-(COLOR)

- UECEF End Frame Upright End Cover
- COLOR SB=Black, CH=Chocolate

Metal Upright End Cover

- Metal cover trims the end Upright of all runs
- Easy snap-on positive locking
- Standard colors for VC are Sahara, Chocolate, or Snow White
- Used to cover exposed Upright below the end frame

VC-(NH)

- VC Metal Upright End Cover
- NH Nominal Height 36" to 96" in 6" increments (914 mm to 2438 mm in 152 mm increments)

Offset Loading

A freestanding wall section is ideal for promotional use at the end of a Maxi Line run when the loading exceeds capacity of the End Frame and Metal End Flat combination. **The load capacity of an end displayer may not exceed 15,000 inch-pounds!** See Shelf Loading Section for explanations of offset loading and front loading of upper shelves. (Base shelves do not affect the loading calculations.)

NOTE!
Unit must be ordered with two backs, PH, PP or HH.
Rear kickplates should be ordered for all gondola end displayers.

Standard Base Shelf

- Order one Wall End plus one wall section for 36" or 48" width x desired height

Wrap Around Base Shelf

- See the "How to Order Complete Sections" on how to delete Base Shelves and replace with
- Wrap Around Base Shelves when ordering a wall section. Also, section explains how to delete Base End Covers when ordering a Wall End
- Includes special Base End Covers

Wall Section Stabilizer Frame

- Utilizing a wall section as an End Frame, attach the wall section (without Base Shelf) to the Gondola using Wall Section Stabilizer Frame to stabilize wall section
- Order necessary Basic Uprights, Open Back Stiffeners, backs, spanners, Upright End Covers, and Rear Kickplates

NOTE!

The WSSF can be used with all illustrations shown on this page.

Lower Wall Stabilizer

- Supports and fixes wall sections in place (such as Freestanding Gondola Base End Caps) on the end of gondola runs
- Can be used with gondolas mounted on casters to secure wall sections on casters at the end of the gondola
- The "saddle" is in the middle of the wall section and is designed for applications where the wall is centered on the gondola
- Includes two Top Spanner (STL) Clips (STLCLIP) to be used with the Top Spanner on the gondola section behind the end cap

Maxi Line Shelves & Accessories

Standard Upper Shelf Flat, 15° or 30° Downslope^A

- 1¼" (32 mm) tag molding integrally formed into front edge of shelf surface
- Versatility of three positions: Flat, 15° downslope or 30° downslope
- SUS and STP shelves do not align when placed side by side
- Load capacity for 3' and 4' (914 mm and 1219 mm), see Shelf Loading on product safety page
- Load capacity for 2' (610 mm) wide shelves in depths 06" to 18" (152 mm to 457 mm) is 50% of 4' (1219 mm) wide shelves.

NOTE!

If add-on aluminum tag molding is desired, use selected type as suffix immediately after part number.

Example: SUS-416-M17S
See tag molding selection pages.

Tubular Metal Bumper System

- Designed to help prevent damage to base-shelf tag molding from shopping carts, pallet jacks, and floor buffers
- Starter includes bumper and two mounting brackets
- Add-on includes bumper tube and splicer bracket
- End Cap is designed to mount on Wall Sections at end of gondola runs where wall-section width matches width of gondola
- Cannot be used by itself; the Tubular Metal Bumper System requires starter and add-on sections

End Panels, Square & Radius

- Edgework matches exterior finish on all panels
- T-mold option not available on mirror plex panels
- For 12" (305 mm) high base, add suffix -12

Vertical Dividers

Separate lumber, doors, shutters, molding, lawn furniture, or similar merchandise with divider arms or M dividers. Choose from 3/8" (10 mm) diameter regular-duty or 1" (25 mm) square heavy-duty arms. Merchandising capabilities are practically endless with our wide selection of arm lengths and Vertical Divider standoffs.

- At 90°, add crossbar standoff to VDA length
- At 45°, subtract VDB standoff from Base Shelf depth, multiply result times 1.33; result is maximum VDA length when mounted
- **Example:** 20" (508 mm) Base Shelf depth - 2" (51 mm) VDB standoff = 18" (457 mm)
18" x 1.33" = 23.94" (457 mm x 34 mm = 608 mm) maximum VDA mounted length
- **Therefore:** Maximum 24" (610 mm) length VDA at 45° on a 2" (51 mm) standoff will not project past 20" (508 mm) base shelf

Vertical Divider Bar

- 1" (25 mm x 25 mm) square tubing has .40" (10 mm) diameter holes 1" (25 mm) OC to accept upright, rolled merchandise
- Includes heavy-duty bracket to attach to Basic Upright
- One crossbar required per section
- Load capacity is 100 lbs

Threaded Vertical Divider Arms

- Unique mounting attachment allows straight-out or 45° (either direction) mounting to Vertical Divider Bar [VDB-(NW)02]
- Arms may be mounted to front and/or rear of standoff bars
- Regular-duty divider arms 3/8" (10 mm) diameter with red neoprene safety tip
- Heavy-duty arms 1" (25 mm) square tubing with vinyl safety cap
- Threaded option locks arm and prevents accidental dismounting
- Standard finishes: Sahara or Blue Gray

 H=Heavy-Duty

M Vertical Divider Arms

- Same mounting pin system as divider arms for installation into VDB[VDB-(NW)(ND)], providing greater side-to-side load resistance than divider arms
- M Vertical Divider Arms are designed so the top of the divider is 4" (102 mm) deeper than the bottom divider, so that product leans back (see illustration) **Example:** MVDA-1848R
- Light-duty divider is a 3/8" (10 mm) diameter steel rod; heavy-duty divider is 3/4" (19 mm) diameter steel tubing
- Vertical Divider Bar [VDB-(NW)(ND)] at bottom needs to be 4" (102 mm) deeper than the top Vertical Divider Bar (ordered separately)

A Light Fixture Radius Canopy Frame

LFRCF

LFRCF Light Fixture Radius Canopy Frame

- Extends approximately 36½" (927 mm) from Maxi Line gondola/wall uprights
- Signage channels are built into canopy
- Canopy signage should measure 3⅞"H (98 mm) with a maximum thickness of ⅜" (2 mm)
- Retailers can have signage designed to fit entire width of canopy, or just a portion, but the width cannot exceed 56⅞" (1445 mm)

B D Light Fixture End Panels

LFEP-(TYPE)

LFEP Light Fixture End Panel
 TYPE E=End
 I=Intermediate

- Concave curve on front of each End or Intermediate Panel adds style and dimension
- Each panel is ¾" (19 mm) thick and laminated on both sides, with matching edge banding along the front of the panels
- Bracket hardware is included to assist in assembly

L Light Fixture Lower Hardboard

- Panels are constructed of laminated hardboard measuring 5/32" (4 mm) thickness
- Lower hardboard panel laminated only on one side
- 2" (51 mm) diameter hole is cut out of one end of the panel, offering access to a main power supply if needed
- Optional insert included to enclose 2" (51 mm) hole if electrical access is unnecessary
- Optional insert is black

LFLHBP

LF Light Fixture
LHBP Lower Hardboard Laminated Panel

E Light Fixture Display Flush Front Shelf

- Serves as base component; shelf is installed first and all other pieces are built atop unit to complete display
- Has zero-hit brackets where shelf fits perpendicular to uprights
- Channel is welded onto back of shelf
- Channel in combination with Light Fixture Intermediate Crossbar, (LFCB-I), supplies a track for the Fixture Panels (LFP or LFP-FX) to slide into place

- Customer-supplied signage should be 15"H x 47½"W (381 mm x 1207 mm)
- Thickness of signage material must be less than ⅛" (3 mm)
- Sign panels install underneath Light Fixture Radius Canopy Frame [LFRCF]

LFSB

LFSB Light Fixture Signage Board

G H Light Fixture Panels

- Total of 28 panels required to complete 64½"H (1638 mm) Light Fixture Display
- Light Fixture Radius Canopy Frame requires 10 Light Fixture Panels
- Panels are ordered in a combination that best fits retailer's display needs; panels are solid or can be ordered with 2"H x 2"W (51 mm x 51 mm) cutout for displaying light fixtures
- LFPs are attached to panels by using mounting hardware (supplied with the light fixture)
- Power, if required, is easily accessible to installed light fixtures through electrical knockouts
- Panels slide into place on Light Fixture Display using track created with Light Fixture Crossbars [LFCB-(TYPE)]

LFP-(TYPE)

LFP Light Fixture Panel
TYPE Blank=No Cut Out

INNOVATION ON DISPLAY

Maxi Line Systems

Maxi Line Rolling Frame System

Clean, organized displays attract more customers, but stocking enough merchandise to meet demand is important, too. Give your customers plenty of selection while maintaining an attractive appearance with the Maxi Line Rolling Frame System. This system enables retailers to display samples in front of stocked merchandise without sacrificing valuable selling space. Spring cushions provide greater stability and smoother motion, so displayed items remain in place as the panels slide back and forth along the track. The panel frames can also support pegboard, creating cross-selling opportunities for small, hanging merchandise.

- Space-efficient Maxi Line units
- Allows for more floor space
- Available in 3' or 4' (914 mm or 1219 mm) lengths
- Inside shelf space 8" to 14" (203 mm to 356 mm)

B Basic Upright^A

- Slotted 1" (25 mm) OC for flexibility plus maximum space
- Engineered of heavy-gauge, high-tensile steel components welded into a single unit with a 15,000 inch-pound rating
- All Basic Uprights have integrated leveler

BU-(NH)

- BU Basic Upright
- NH Nominal Height 36" to 144" in 6" increments (914 mm to 3658 mm in 152 mm increments)

C Base Shoe, Straight-In Locking^A

- Projection-welded, high-tensile steel gives maximum load capacity
- Exclusive I-beam design is 5" (127 mm) low
- Screwdriver leveling and electrical access
- Straight-in insertion does not require tipping of the Basic Upright for installation
- Finishes are random unless Chocolate is specified

BSSIL-(ND)

- BSSIL Straight-In Locking Base Shoe
- ND Nominal Depth 12" to 30" in 2" increments (304 mm to 762 mm in 50 mm increments)

D Standard Base Shelf^A

- Formed price-tag molding matches molding on upper shelves
- Heavy-gauge shelf bracket features lock tab to ensure quick installation and precision alignment
- Load capacity is 600 lbs in all sizes, based on evenly distributed static loading
- Flush Front option available

SBS-(NW)(ND)

- SBS Standard Base Shelf
- NW Nominal Width 2' to 4' in 6" increments (610 mm to 1219 mm in 152 mm increments)
- ND Nominal Depth 12" to 30" in 2" increments (305 mm to 762 mm in 51 mm increments)

- For use with Round Metal Upper Shelf
- Attaches to Basic Upright (field assembly)

BUESI(NH)

- BUESI Basic Upright End Shelf Insert Only
 NH Nominal Height 48" to 78" in 6" increments
 (1219 mm to 1981 mm in 152 mm increments)

**H Round Metal Upper Shelf Modified**

- Allows continuous display of product at the end of a gondola run
- Does not block view of merchandise
- Load capacity is 200 lbs

RMUSM(NR)

- RMUSM Round Metal Upper Shelf Modified
 NR Nominal Radius 12" to 24" in 2" increments
 (305 mm to 610 mm in 51 mm increments)

**I Round Metal Base Shelf**

- Allows continuous display of product at the end of a gondola run
- Does not block view of merchandise
- Load capacity is 300 lbs

RMBS(NW)(ND)

- RMBS Round Metal Base Shelf
 NW Nominal Width 24" to 48" in 4" increments

 (305 mm to 610 mm in 51 mm increments)

**K Seismic Tie Bar^A**

- Stabilizes Maxi Line Basic Uprights when required by local or state building codes
- Bar may also be used if additional support is necessary for larger loads
- Hardware pack included

SCS-(NW)

- SCS Seismic Tie Bar
 NW Nominal Width 12"
 (305 mm)

Three-Way End Merchandiser (shown with optional canopy)

- Designed with broad selection of widths, depths, and heights to match adjoining fixture run
- May be used at end of gondola/wall a heavy-duty racking runs
- Laminated deck/rear panel have
- T-Mold edging
- Optional Bumper Mold available for deck only
- 8" (203 mm) high optional laminated canopy (ordered separately)
- Section loading front and sides: 500 lbs per section
- Section loading front and sides: 500 lbs
- Shelf load capacity 200 lbs

NOTE!
Unit does not include Upper Shelves. It is recommended that shelves be tiered for better lighting, with the depth of lowest shelf being 2" (51 mm) less than base depth.

B Rolling Gondola Bottom Tube

- Securely joins the different uprights using push-pin technology
- A track is welded to the top of the RGD Bottom Tube, providing a resting place for the chosen backs (hardboard, pegboard, multi-purpose, or mini-grid)

RGDBT(NW)

RGDBT RGD Bottom Tube Assembly
 NW Nominal Width 36", 42" or 48"
 (914 mm, 1067 mm or 1219 mm)

C1 Rolling Gondola Top Tube Fixed

- Create a 3', 4', 6' or 8' (914 mm, 1219 mm, 1829 mm, or 2438 mm) Rolling Gondola using the RGD Top Tubes Fixed [RGDTTF(NW)]
- Spans the entire RGD unit, maintaining specified length the unit was ordered
- Intermediate and End Top Tubes, [RGDTT(OPT)] should be ordered if unit greater than 8' (2438 mm) is desired
- When using RGD Top Tube Fixed in a single-section configuration, the RGD Upright Intermediate is not required

RGDTTF(NW)

RGDTTF RGD Top Tube Fixed
 NW Nominal Width 36", 48", 72" or 96"
 (914 mm, 1219 mm, 1829 mm or 2438 mm)

C2 Rolling Gondola Top Tube

- Securely holds back panels in place through the use of locking-snap buttons
- Must connect Top Tubes on a Variable Gondola with RDG Top Tube Connectors (RGDTTC)
- Combine two sections to create a longer aisle with the following:
 - Rolling Gondola Top Intermediate [RGDTTI(NW)]
 - Rolling Gondola Top End Tubes [RGDTTE(NW)]
 - Rolling Gondola Top Tube Connectors (RGDTTC)

RGDTT(OPT)(NW)

RGDTT RGD Top Tube
 OPT I=Intermediate
 E=End
 NW Nominal Width 36", 42" or 48"
 (914 mm, 1067 mm or 1219 mm)

D Rolling Gondola Upright Intermediate or End

- Made of 1" x 2¾" (51 mm x 70 mm) tubing
- 1" (25 mm) OC slotting
- Triple-track retainers are welded onto both sides of the upright with 3" (76 mm) locking casters installed on base of upright
- Each upright has a connector piece welded onto each side where the RGD Bottom Tube [RGDBT(NW)] attaches and locks into place
- End upright can be used in place of the Rolling Gondola Upright Feature End [RGDUFE(NH)(ND)(BACK)]

RGDU(OPT)(NH)(ND)

RGDU RGD Upright
 OPT I=Intermediate
 E=End
 NH Nominal Height 36" to 72" in 6" increments
 (914 mm to 1829 mm in 152 mm increments)
 ND Nominal Depth 36" to 48" in 6" increments
 (914 mm to 1219 mm in 152 mm increments)

E Rolling Gondola Hardboard or Pegboard Backs

- Two backs required for each section
- Triple-track retainers are welded onto uprights, providing a groove for back panels to slide into their proper placing
- RGD Bottom Tube [RGDBT(NW)] also has a track that stops and properly holds backs in place

RGDB(NW)(NH)(TYPE)

RGDB RGD Back

NW Nominal Width 36" to 48" in 6" increments
(914 mm to 1219 mm in 152 mm Increments)

Rolling Gondola Top Tube Connector

RGDTTC
RGDTTC.... RGD Top Tube Connector

- Variable Rolling Gondolas are created when RGD Top Tube Connectors are used in conjunction with RGD Intermediate and End Top Tubes [RGDTT(OPT)]
- RGD Top Tube Connectors rest on top of Intermediate and End Top Tubes simulating a solid top cap
- Push-pins keep the RGD Top Tube Connectors (RGDTTC), in place

Tube Line T-Rack Upright Connector Bracket

TLTRUCB
TLTR.... Tube Line T-Rack
UCB.... Upright Connector Bracket

- Use four (required) to connect two RGD Upright Ends [RGDUE(NH)(ND)]
- Creates 1" (25 mm) gap between the uprights, allowing the casters to spin and roll properly

Rolling Gondola Retainer System

RGDBR-(NW)(NH)
RGDBR.... RGD Back Retaining System
NW Nominal Width 36" to 72" in 6" increments
(914 mm to 1829 mm in 152 mm increments)
NH Nominal Height 36" to 48" in 6" increments
(914 mm to 1219 mm in 152 mm increments)

- Hardboard, pegboard, mini-grid, and multi-grid panels are held into place in RGD Feature End Uprights by use of Rolling Gondola Back Retaining System
- This retainer system is only necessary if RGD Upright Feature Ends [RGDUFE(NH)(ND)(BACK)] are originally ordered without backs and retailer decides at a later date to have back panels added to the RGD Upright Feature End

Mobile Gondola Plate Caster

- Move gondola runs without having to dismantle the fixtures
- Assembles to Maxi Line Gondola Base Shoes and Basic Uprights
- Minimum depth of Base Shelf and Base Shoe is 12" (305 mm)
- Maximum height: depth ratio of 2.5:1
- Maximum upright height: 78" (1981 mm)
- Maximum of three sections per run
- Load capacity:
 - 36"-48" 1000 lbs per gondola section
 - 36"-48" 900 lbs with end frames
 - 60" 750 lbs per gondola section
 - 60" 650 lbs with end frames

MGPC(NW)

MIPS – Maxi Integrated Pallet System

The Maxi Line Integrated Pallet System (MIPS) displays palletized merchandise within conventional shelving sections, enabling retailers to expand their merchandising options within a shopping aisle and reduce restocking labor. Madix estimates that MIPS can cut at least ten hours an aisle per week of restocking, and it also precludes employee injuries from lifting heavy boxes/merchandise.

The MIPS is particularly well suited to high-density merchandise that must be repeatedly restocked. The system is comprised of components that may be specified in new stores or retrofitted to existing Maxi Shelving. This flexibility permits stores to convert areas back to conventional displays as merchandise needs to change.

- Utilizes conventional Maxi Line parts and accessories, including standard shelves, in depths that optimize merchandise presentation
- Product can be added to existing shelving by removing Base Shelf, Kickplates and Base End Covers; this process can also be reversed to convert back to conventional shelving
- For applications that require additional load capacity, Hypermaxi can be installed
- No change in load capacity when installed per instructions

NOTE!
A 4' (1219 mm) section requires a pallet that does not exceed 44" (1118 mm) wide

Hypermaxi System

Hypermaxi is a sub-system of modified Wide Span shelving. This product increases the versatility of basic Maxi Line components by adding stock storage above the fixture to optimize space usage.

Hypermaxi may be used throughout the store or specifically applied to categories as small as 3' (914 mm). Choose Upper Decks plus optional Intermediate Decks (as opposed to Standard Base and Upper Shelves), depending on the type of merchandise involved.

How To Order

Order basic shelving run from Maxi Line catalog.

Then +

Order add-on Hypermaxi components from the following pages.

Outside Mount End Merchandisers, TOEM, and/or Metal End Flats (FMEF) may be used with Hypermaxi.

Standard End Frames, End Panels, Canopy End Panels, and Canopy Ends may not be used with the Hypermaxi system.

NOTE!
HAND STACK ONLY!
Powered forklifts or stackers are not recommended for use with Hypermaxi Storage System.

Hypermaxi Over Gondola

A simple and economical way to achieve overhead reserve stock. Hypermaxi uprights and alternate Basic Uprights are equal in height. Height of intermediate Basic Uprights and all backs should be at least 12" shorter than the Hypermaxi uprights. All components are from the standard catalog, except decks and deck supports, shown on the next two pages. Order metal extension upright end covers for the higher Basic Uprights.

Instructions for ordering NEW Hypermaxi Over Gondola Runs (HMOG)

Do not order 12" (305 mm) extension upright. Order every other upright 12" (305 mm) taller than the middle upright and order the backs to the height of the shorter middle upright.

HAND STACK ONLY!
Powered forklifts or stackers are not recommended for use on Hypermaxi shelving.

NOTE!

DO NOT exceed capacity stamped on the beams with correct amount of deck supports correctly installed. The weight capacity stamped on the beams, is only for the beams and not the system. Increasing the vertical space between beams or support arms will increase the chance of Hypermaxi column buckling, resulting in a diminished load capacity. Due to variations in installation and merchandising, system capacities cannot be predetermined. Contact you Madix Sales Representative to obtain installation specific information.

Hypermaxi EU

Introducing a sleeker, more sophisticated solution for retail display and storage! Inspired by European designs, Madix's new Hypermaxi EU system gives retailers an attractive merchandising platform without sacrificing functionality. This fixture is perfect for generating additional space overhead for stock storage, so you can get the most out of your square footage. Hypermaxi EU can be applied to specific merchandise categories in sections as small as three feet (914 mm), or it can be used universally throughout the store. Your Madix sales representative is available today for consultation on how Hypermaxi EU can benefit your store layouts and merchandising schemes.

Cantilever Storage System

The Cantilever Storage System is constructed with Maxi Line components for a unique appearance. A choice of one or two deck levels are available (with wood or wire grid decks). Light Canopies are also an attractive option available for Cantilever Systems and can attach directly to the Cantilever Arms.

In order to use the system properly and safely, please follow the instructions below.

1. Whenever the system is installed, it must always be with these parts (NO EXCEPTIONS):
 - a. Double Welded Uprights
 - b. Double Stacked Shoes
2. The Cantilever Arms may not be deeper than the Base Shelves.
3. Load capacities are listed in the diagrams below.
4. Cantilever Arms may not be used higher than 144" (3658 mm).
5. Custom alternatives to the applications listed below require extensive testing before approval; client must be fully apprised of system's use and limitations before Madix approve the use of Cantilever Arms in a non-standard application

NOTE!
HAND STACK ONLY!
 Powered fork trucks on stackers are not recommended for use on Cantilever Storage System.

All examples below are for 8' (2438 mm) sections, divide by 2 for 4' (1219 mm)

Wall or gondola runs with a single Cantilever

Load capacity 1600 lbs

Wall runs with two Cantilever levels

Cannot exceed 1600 lbs on any single 8' level, and may not exceed 2000 lbs

Gondola runs with two Cantilever levels

Load capacity per level 1600 lbs
 Load capacity per side 3200 lbs

If offset loaded, the offset load difference cannot exceed 28,000 inch-lbs.

Beam LED Canopy Light^A

- 3' and 4' lengths (914 mm and 1219 mm)
- Maintenance-free life in excess of 50,000 hours (11 years at 12 hours/day)
- Uses same Power Supply and Jumper Cables as LEDge Light
- Durable aluminum extrusion
- Integrated magnets make installation on metal shelves or other surfaces easy and allow fast changes
- End tabs with holes for fastening to wood canopy and metal canopy brackets
- Certified by the DesignLights™ Consortium (DLC) and Underwriters Laboratories, Inc. (UL)
- DLC certification provides potential utility rebates
- All plug 'n play connections– no electrician required (Class 2 system)
- Multiple units are connected using LEDge Light Jumper Cables [LLJ(NL)] or LEDge Light Harness Assembly [LLHA]
- May be daisy-chained to single power supply for "single row" applications
- 100W power supply can power up to seven 48" (1219 mm) lights
- Color temperature: 4,200K
- Color Rendering Index (CRI) of 85
- Low power consumption helps meet California Title 24 lighting regulations

Maxi Slice

Maxi Slice's upright system provides interesting merchandising opportunities by breaking up a common gondola into flexible sections. Give merchandise more 'pop' and cross-sell products by adding shelves and accessories in smaller categories.

Slice gives merchandise the opportunity to have shelves planogrammed to what is needed rather than being restricted to 3' and 4' (914 mm and 1219 mm) sections.

- Can be used on one or both sides of a gondola
- Can be installed in existing Madix Maxi Line shelving
- Backs are available in pegboard, hardboard, and BWGH wire backs (Can not be used with slatwall backs)

NOTE!

If you order a BWGH Wire Back and a back on the other side, the back could be painted on two sides.

@FRONT

**ROLLER-SHELF SYSTEM
FOR REFRIGERATED APPLICATIONS**

Create a perfectly stocked shelf instantly with @Front! @Front incorporates multiple small, rolling tracks that work with gravity to automatically feed cooler merchandise to front of shelf, cutting time and labor necessary for store merchandising and facing. Dividers can be easily adjusted in mere seconds, accommodating bottled, canned, and boxed goods of varying size and shape. Rolling-track system is fully integrated with the shelf itself, little to no maintenance required. Simply remove the entire shelf for a thorough wash, or wipe the rollers with a damp cloth to remove light dust and debris. Unique, patented design uses all plastic construction, allowing roller replacement from top surface (spare rollers integrated into bottom of every shelf). 5° downtilt improves sight lines for better visual impact than other gravity feed systems. Replaces cumbersome, spring pusher systems.

- @Front Roller Shelf System for Hussmann and Hill Phoenix Coolers
- @Front is the only NSF listed roller system due to patented design
- @Front feature: Landing zone to reduce/eliminate roller damage from dropped merchandise
- @Front snap-in design for replacement rollers; each roller mat includes a package of replacement rollers, attached to the underside of mat
- @Front design has drain for fluid; fluid collects and rollers become inoperative
- Easy to clean: remove mat and pressure wash due to all plastic construction
- Kits are packed two per carton: two shelf frames, two roller mats and two shelves of accessories

@FRONT

ROLLER SHELF SYSTEM

Create a perfectly stocked shelf instantly with @Front! @Front incorporates multiple small, rolling tracks that work with gravity to automatically feed merchandise to front of shelf, cutting time and labor necessary for store merchandising and facing. Metal dividers can be easily adjusted in mere seconds, accommodating bottled, canned, and boxed goods of varying size and shape. Rolling-track system is fully integrated with the shelf itself, little to no maintenance required. Simply remove the entire shelf for a thorough wash, or wipe the rollers with a damp cloth to remove light dust and debris. Unique, patented design uses all plastic construction, allowing roller replacement from top surface (spare rollers integrated into bottom of every shelf). 5° downtilt improves sight lines for better visual impact than other gravity feed systems. Replaces cumbersome, spring pusher systems.

@Front Shelf

- Provides more merchandising space and better visibility while saving labor and keeping shelves looking fully stocked
- More durable than other self-fronting systems like pushers and slip mats
- Patented system with 3 year warranty
- Clear Fronts available in 2", 3" or 4" heights (51 mm, 76 mm or 102 mm)
- Dividers available in 1" or 2" (51 mm or 76 mm) heights
- 36" ONLY available in 18", 22" or 24" (356 mm, 457 mm, 559 mm or 610 mm)
- Dividers adjust in 1/8" (.318 mm) increments for maximum space efficiency
- Order roller mat and shelf frame separately
- Roller mat is available in beige or black finish, and 14", 18", 22" or 24" depths (356 mm, 457 mm, 559 mm or 610 mm)
- Roller shelf frame has weld-on tag mold standard; DGA2A, DGA2P (painted) aluminum price tag molding optional
- Load capacity is 200 lbs

@FRONT

ROLLER-SHELF SYSTEM

GEN 5 SYSTEM

The @Front G5 converts most standard Madix shelves into a self-fronting, gravity-feed system, cutting manual labor costs and time while making merchandise more accessible to customers.

@Front helps retailers maintain the appearance of a neat, fully stocked display almost effortlessly. Durable roller segments replace traditional spring-pusher systems to reduce shrink, minimize the number of mis-stocked items, and provide more flexibility for merchandising changes.

Order components for a complete system:

- @Front Pitch Converter - required to create a 6° to 7° downtilt (standard 15° downtilt is too steep for roller systems) or Downtilt Shelf 7° [DTS7-(NW)(ND)] can be used without pitch converter
- @Front G5 Rail Set
 - Features slots to attach a plastic front/guard to the lip of the shelf
 - Both ends of the Rail Set have provisions to snap-fit the roller track
 - Includes pine-tree fasteners for attachment to standard shelf perforations
- @Front G5 Roller Track - includes a single strip of rollers for smaller merchandise (use two or more tracks for larger/heavier merchandise)
- @Front G5 Divider
 - Snaps into the roller track to separate and retain merchandise columns
 - Adjusts left or right using integrated ratchet
 - Must be ordered in the same depth as the @Front G5 Roller Track
- @Front Plastic Front Retainer - clear plastic front available in 2", 3" or 4" (51 mm, 76 mm, or 102 mm)

@Front Shelf Pitch Converter

- Downtilt of 6° to 7°
- Compatible with all Standard Upper Shelf [SUS-(NW)(ND)], Straight-in Insertion [STP(NW)(ND)], 18" (457 mm) or smaller
- Use of the Pitch Converter [AFP-(COLOR)] will increase the shelf depth by 21/2 (64 mm)
- **Example:** When a 14" (356 mm) deep shelf is used with a Pitch Converter [AFP-(COLOR)], the overall depth will be 16 1/2" (419 mm)
- Available only in beige or black

Prices All prices are subject to change without notice. Every effort will be made to give advance notice of any increase through notification from the home office. The customer will receive an acknowledgement showing prevailing prices at the time the order is processed. State or other sales or use taxes, freight and surcharges will be charged when applicable. Freight quotes may be provided based upon information available at time of quote, but are not guaranteed. Active freight charges will be billed if applicable. When market conditions dictate, a surcharge may be implemented. All quotations automatically expire at the end of 30 days.

Terms Cash in advance prior to production or net 30 days if open account status is approved by Madix Credit Department. MasterCard, Visa, and American Express are accepted.

Acceptance All orders, contracts, and agreements are subject to Madix's acceptance and approval. Madix shall not be liable for any delay in the performance of any order, contract, in the delivery of any goods, or for any damages resulting from such delay, when such delay is directly or indirectly caused by or due to fire, flood, accident, riot, act of God, war, governmental decree or order, strike, labor difficulties, shortage of labor, fuel, power, material or supplies, transportation delay or any other delay or causes (whether or not similar to any of those herein before specified) beyond our reasonable control. Order acceptance will be per the conditions and terms outlined in Madix's acknowledgement. Mailing of the acknowledgement will signify Madix's acceptance of the order.

Minimum Charge Orders are subject to a minimum charge of \$50.00 net (merchandise only) per shipping destination.

Changes and Cancellations Customer requested changes and cancellations are subject to approval by Madix. Every reasonable effort will be made to accommodate these requests without additional cost to the customer. Any manufacturing or engineering costs incurred will be charged to the customer. Orders produced and delayed for more than one week may incur charges for demurrage, unloading, or other storage costs. Madix will advise customers of the estimated charges at the time changes or cancellations are made.

Shipments Method and route of shipment are at Madix's discretion unless Madix is furnished with complete shipping instructions at least ten (10) days before the scheduled shipping date. Freight is FOB/EXW Madix shipping point.

Freight Claims For common carrier shipments, claims must be made directly with the carrier by the recipient. Listed are the types of losses which may occur, and your responsibility in handling them:

Loss of Freight: It is the receiver's responsibility to count the freight at the time of delivery. Any exception must be noted on the carrier's delivery receipt at time of delivery.

Damage of Freight: As with a loss of freight, damage of freight must be noted on the carrier's delivery receipt at the time of delivery. It is the receiver's responsibility to make sure that the freight is inspected for visible damage and that the number of pieces damaged is marked on the carrier's delivery receipt. Failure to note visible damage at the time of delivery will result in non-payment of a damage freight claim. Salvage must be held for the carrier.

Concealed Damage: If goods are received in apparently good condition but there is concealed damage, it is the customer's responsibility to contact your Madix Service Representative within 15 calendar days from delivery. Customer must keep the product and the packaging so that an inspection may be conducted by the carrier. Failure to handle a concealed damage claim in this manner could greatly reduce the amount recovered from the carrier.

Returned Goods Returned Goods requests must be submitted to Madix, Inc. within 60 days after receipt of product. Authorization must be in writing on Madix's RGA (Return Goods Authorization) form. Goods must be received within 30 days of RGA issue date for credit. Customer is responsible for delivery of authorized returns to Madix designated location in condition originally received. Only Code A products finished in returnable colors as indicated on the finish policy pages will be considered for return, and only items in unused, in resalable condition, and in the original packaging. No special size, color, or specially manufactured parts or products are eligible for return unless sent to the customer as the result of an error by Madix. Only merchandise listed on the RGA will be accepted for conditional return. Credit will not be issued for that portion of merchandise that is not considered resalable. A handling and restocking charge of 25% of the invoice price will be charged for all approved returns. Submit requests to your Madix Sales Representative or Customer Service Department prior to returning any merchandise. All returns must be have the customer name and Madix RGA number prominently displayed on each package. Product to be shipped prepaid at customer's expense unless prior approval has been received from an authorized Madix Sales Representative.

Warranty We warrant to the original purchaser that all products manufactured by Madix are free from defects in material and workmanship. This warranty is invalid if products or parts are modified or used in a manner other than the intended purpose. Our obligation under this warranty is limited to repairing or replacing of any part or parts which shall, within one (1) year after delivery to the original purchaser, be demonstrated to be defective under normal use and service. This warranty is in lieu of all other warranties, expressed or implied, and of all other obligations or liabilities of any kind on Madix's part, and no modification of this warranty shall be valid or binding unless in writing and signed by an officer of Madix, Inc.

Production Madix fixtures are manufactured utilizing the most current technology of highly automated systems with process control techniques. Skilled craftsmanship, combined with automatic presses, roll forming machines, multi-spot welders, conveyers, finishing equipment and thorough inspections produce store fixtures of the highest quality.

Upright Carefully engineered of heavy gauge, high quality steel components, the UPRIGHT is slotted one inch on center for maximum flexibility, shelf adjustability and use of available space. Standard heights range from 36" through 96" with built-in leveler. For the finishing touch at the end of the shelving run, the snap-on UPRIGHT END COVER is made of durable, scuff and impact resistant plastic or heavy gauge metal. The UPRIGHT CAP, made of high impact plastic, has provision for a sign holder.

Base Shoe The five inch low BASE SHOE features exclusive "I" beam design, engineered of projection welded high strength steel parts insuring maximum load capacity. Snaps securely into upright with leveler and electrical access allowing for quick error free installation. For the finished look, the one piece slip on BASE END COVER is made with a high impact plastic nose reinforcement to protect base shelf tag molding.

Spanners Snap-in support SPANNERS keep uprights at equal spacing and hold the back panels rigid. Each spanner has knockouts for electrical access and telescoping uprights.

Back Panels High density hardboard BACKS fit flush to the face of the upright. A wide variety of finishes include solid, pegboard and wood grain in a wide assortment of optional colors. Mirrors and open backs are also available.

Kickplate Fully floating feature of kickplate allows flush fit against uneven floors, snaps in and out without disturbing base shelf for easy cleaning. Convenient knockout accommodates electrical access.

Base and Upper Shelves Steel base shelves feature lock tabs to insure quick installation and precision alignment. A double row of 1/4" inch perforations on the front and rear edge makes any form for binning possible. Slim bracket, high tensile design with flat or 15 degree downslope upper shelf positions allow for maximum merchandise visibility. Integrally formed price tag molding accommodates 11/4" tag. Upper shelves available in 8", 10", 12", 14", 16", 20", 22", 24", 26", 28", and 30" depths. Base shelves available in 12", 14", 16", 18", 20", 22" 24", 26", 28" and 30" depths.

Shelf Loading The recommended load capacity for upper shelves is based on evenly distributed weight. Capacities are reduced by 35% when front half is loaded and reflect rated maximum load. Load capacities are shown in the General Information Section under Shelf Loading.

Baked Enamel, Powder Coat Finishes All metal parts are finished with a specially formulated high solids or powder which are electrostatically bonded in a unique multi-stage process, to insure the highest quality finish. Aerosol cans of Touch-up paint are available in Madix's standard and optional colors. FAA regulations prohibit the shipment of this product by air or in export containers by air or ocean to countries outside the United States.

Product Maintenance When necessary to clean Madix shelving, use a non-abrasive mild detergent and warm water, followed by thorough drying. The use of a cloth made of a soft white cotton material is strongly recommended. The use of cleaning products that contain abrasive, bleach, or strong solvents, such as ketones, ethers, etc. will result in damage to the finish. The damage is most severe when these harsh cleaning agents are used on colors which contain leafing aluminum pigment such as powder chrome, silver vein, and other "vein" type finishes. The aluminum in these coatings resides at the surface of the finish and is therefore susceptible to damage by the harsh cleaning agents. As an alternative to the mild detergent, cleaners with ingredients similar to those found in products such as 409, Fantastik, and Simple Green can be used. Caution! Cleaners having ingredients similar to those found in Ajax, Borax, Comet, etc. should be avoided as finish damage could result.

Codes In your planning stage, consult with local municipal engineers to determine what codes and restrictions will be applicable in the locations where the shelving will be used. Codes may include: state, local, fire, building, and health and safety codes. Seismic requirements may apply in some locations. For example, in most locations fire codes state that fixtures need to be at least 18 inches below the sprinklers.

Shelving Selection Take into consideration the load that is expected not only on each shelf but also on the unit as a whole. Take into account the upright capacity. Refer to the load capacity information that is in the Madix Standard Catalog. Madix shelves are rated using an evenly distributed load. Do not install shelves or accessories that extend beyond the depth of the Base Shelves. Consider making the Base Shelves and low height fixtures a contrasting color from the floor's color to prevent potential tripping hazards. Do not use Madix parts or accessories for any purpose other than originally intended by Madix.

Shelving Installation Initial installation or relocation of Madix shelving should be supervised by qualified personnel. Madix products should be installed according to Madix's specifications. Madix's installation sequence must be followed for assembly and leveling. An improperly installed store fixture has a poor appearance and may cause a dangerous condition. Be especially careful when leveling fixtures with offset loads in which one side of the fixture has a considerably heavier load than the other side. Dismantling and reassembling used Madix shelving can be dangerous if the installers who are doing the work leave out parts, use damaged parts, or do not reassemble the product by Madix's specifications. Do not alter, modify, or structurally change any shelving component. Do not move assembled shelving. Only parts and accessories that are produced and supplied by Madix are covered by the Madix warranty. Do not assemble Madix fixtures with parts from other manufacturers. Under no circumstances should you use damaged parts. When assembling Gondola/Wall Shelving, install Kickplates to protect the Base Shoes from floor cleaning equipment and to offset the possible bumping and misalignment of the shelving runs. Do not install shelves or accessories on the sides of wall sections or any section that is not supported by Base Shoes. Use caution when handling and transporting shelving parts. Be careful when cutting shrink wrap from pallets because the shelving parts can dislodge from the wrap and fall. Cut the wrap gradually from the top, only as much as you need to remove the product from the top. Two common hazards while installing store fixtures are: employees hurting themselves with improper types of box cutters and employees putting boxes on the floor and then tripping over them.

Anchoring and Floors Depending on code requirements and Madix's specifications, some products must be anchored to the walls and/or floors. Do not lean tall or heavy objects against unanchored shelving systems. Retailers must consider the type of floor upon which the shelving will be installed.

Impact Loading Impact during the loading and unloading of merchandise can create an adverse loading situation and may result in damage to or failure of the Madix shelving. Do not walk or climb on Madix shelving.

Overturning Overloading the top portion of the shelving, non-uniform loading, out-of-plumb installation, and impact can cause shelving to overturn. Improperly installed Madix shelving with offset loads can cause store fixtures to collapse. Carefully follow Madix's installation instructions in order to prevent shelving from overturning.

Additional Shelving Safety Pointers Product loading instructions are included with each Madix order. Retailers must make merchandisers aware of the product's load limitations and the dangers of overloading the shelving. Remove any merchandise or overstock before attempting to move Madix shelving. Periodically inspect your Madix shelving for damaged or loose parts. Make sure that shelves and accessories are properly seated in the slotting or perforations. Make sure that shelves and accessories are not overloaded. As merchandising changes, beware of creating offset loads on shelving runs that are not properly leveled. Look for leveling warning signs such as increased gaps between shelves or accessories that may indicate that the shelving runs need re-leveling. Damage to Madix shelving is dangerous. In some cases, the shelving should be unloaded immediately and repaired or replaced before returning to service. Re-level fixtures that you have bumped or moved. Incorporate safety into your merchandising strategy. When possible, merchandise the heavier products on the lower shelves. If the merchandise will not fit on the Madix shelves and there is a replenishment cycle, make sure that the cycle is a safe one. Make sure that merchandise and overstock are properly stacked and maintained so that items will not fall into the aisles. Assure that customers who handle merchandise or overstock will not push product from one side of the Madix fixture to the other side where people could be injured from falling merchandise. Safely secure overstock that is placed on Madix shelves overhead. Measure the difficulty that your employees have in retrieving overstock, and consider whether employees or customers could be injured if the product happens to fall from the shelving units. Teach employees and inform customers that Madix shelves should never be used as ladders to reach higher shelves. Ladders should be clearly marked for employees use only and should not be left unattended, or customers will try to remove stock on higher shelves by themselves. Notify customers to ask for assistance when they need product that is out of their reach.

Finish Policy for Wood Products

High Pressure Laminate The terms "laminates" or "HPL" are commonly applied to this material which consists of multiple layers of paper infused with phenolic resin and topped by a finish paper coated with clear melamine resin, all totally bonded under high pressure and heat. The finished sheet has extremely high wear and impact resistance.

Customer Specified High Pressure Laminate Madix coding is based on Wilsonart availability. Laminates other than Wilsonart may require additional lead time.

- Customer specified laminates add \$100.00 per pattern, per order
- Additional charge will apply based on the laminate grade that is chosen

Laminates that are not from a laminate manufacturer's standard samples (metallics, heavy textures, wet looks, core edge, special prints) will require a special quote. Contact Customer Service for specific pricing on laminates not listed above.

Thermofused Panels Thermofused panels are ideal for non-wear surfaces and have substantial impact and wear characteristics compared to melamine panels previously available. The product is produced using hot press laminating polyester or melamine resin impregnated self-bonding paper to wood substrate. Performance specifications are available from the American Laminations Association. Madix does not recommend the use of Thermofused panels on horizontal or other wear surfaces.

Printed Mirror Hardboard Printed materials are primarily used for back panels, but appear as various other products. These materials are carefully cross matched to the corresponding laminates and Thermofused. Mylar mirror hardboard is used in the same applications and is also available in pegboard and grooved pegboard. **Finish Policy for Back Panels**

Standard Colors, Returnable– Code A Madix standard returnable colors for display shelving back panels are Sahara, Oyster, and Snow White.

Optional Colors-Level I Finishes (Non-Returnable)– Code B Madix non-returnable back panel colors offered at the optional price are Chocolate, Dove Gray, Dover White, Fashion Gray, Satin Black, Skyline Gray, Blue Gray and Tru Gray. Set-up charge of \$350.00 applies.

Optional Colors-Level II Finishes (Non-Brilliant)– Code B Madix offers optional back panel colors also known as non-brilliant finishes at an additional charge. These colors include custom grays, off whites, tans, and beiges not listed in Madix's Finishes brochure. Products painted with these colors are non-returnable. Set-up charge of \$350.00 applies.

Optional Colors-Level III Finishes (Brilliant)– Code C Brilliant back panel finishes include Hunter Green, Neon Blue, Spectrum Blue, and Spectrum Green. Set-up charge of \$350.00 applies.

Optional Colors-Level IV Finishes (Reds and Yellows)– Code C Use line change charge plus per piece charge supplied by customer service. Special colors are non-returnable. Set-up charge of \$350.00 applies.

Pricing For Levels II To IV

Level II 1.2 x the difference between the Hardboard/Pegboard Optional Color pricing and the Hardboard/Pegboard Sahara pricing. **Example:** Optional upcharge for a BH-342 with a Level II finish would be calculated as follows: \$13.85 - \$12.45 = \$1.40 x 1.2 = \$1.68. The color upcharge for a BH-342 with a Level II finish is \$1.68. This upcharge amount will be added to the Optional Color price of a BH-342. The new price of a BH-342 using a Level II finish is \$15.53 (\$13.85 + \$1.68 = \$15.53).

Level III 1.4 x the difference between the Hardboard/Pegboard Optional Color pricing and the Hardboard/Pegboard Sahara pricing. **Example:** Optional upcharge for a BH-342 with a Level III finish would be calculated as follows: \$13.85 - \$12.45 = \$1.40 x 1.4 = \$1.96. The new color upcharge for a BH-342 with a Level III finish is \$1.96. This upcharge amount will be added to the Optional Color price of a BH-342. The new price of a BH-342 using a Level III finish is \$15.81 (\$13.85 + \$1.96 = \$15.81).

Level IV 1.8 x the difference between the Hardboard/Pegboard Optional Color pricing and the Hardboard/Pegboard Sahara pricing. **Example:** Optional upcharge for a BH-342 with a Level IV finish would be calculated as follows: \$13.85 - \$12.45 = \$1.40 x 1.8 = \$2.52. The color upcharge for a BH-342 with a Level IV finish is \$2.52. This upcharge amount will be added to the Optional Color price of a BH-342. The new price of a BH-342 using a Level IV finish is \$16.37 (\$13.85 + \$2.52 = \$16.37).
