STEP 1 : PEEL PROTECTIVE COVERING FROM ALL PLASTIC BACK PANELS BEFORE INSTALLATION.

STEP 2: INSERT (2) PANELS INTO TRACKS IN FRAME

HINT: DUE TO THE HIGH HEAT OF THE WELDING OPERATIONS, THE UPRIGHTS TEND TO DRAW INWARD, SO YOU MAY NEED TO HAVE SOMEONE HELP YOU SPREAD THE UPRIGHTS APART TO INSTALL BACK PANELS.

BE SURE PANELS SEAT ALL THE WAY IN THE BOTTOM OF BOTH TRACKS.

STEP 3: INSTALL TOP RETAINER
AFTER INSTALLING BACK PANELS, SEAT RETAINER INTO TOP OF UPRIGHTS. A RUBBER MALLOT MAY BE NEEDED. AGAIN, BE SURE THE BACK PANELS ARE ALIGNED WITH THE TRACKS IN THE TOP RETAINER, AND IT IS SEATED ALL THE WAY INTO THE UPRIGHT.
